FY2013 State Responsible Offender Demographic Profile

This report contains offender demographic information for the State Responsible (SR) Confined Offender and Community Corrections populations on June 30, 2013. Gender, race, age and education level are provided for both populations. In addition, information specific to the individual populations is provided. For example, the SR Confined population data also includes custody level, offense and length of stay information. The Community Corrections population also includes the type of supervision, the level of supervision and prior SR incarcerations.

To accommodate different user needs, information is provided on multiple levels. For each population, there is aggregate information summarizing demographic characteristics for the entire populations. In addition, information is provided at the region and facility or district level. For the Community Corrections population, Detention and Diversion Centers are presented along with the Probation and Parole Districts. Information is also provided by type of facility for the SR Confined population.

To provide information supportive of the Virginia Department of Corrections' Re-entry Initiative, demographic information is provided on populations flowing in and out of the SR Confined population. Summary demographic statistics for the FY2013 SR New Court Commitments and FY2013 SR Releases are included in this report.

The terms used in this report are:

- State Responsible (SR) – The SR definition has changed over time and is dependent on several factors: date of offense, offense type (felony or misdemeanor), sentence length and how the sentence is expressed (in years, in months, in days or some combination of the three).
