Audit Findings

Audit Narrative

The auditor’s description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor’s process for the site review.

The auditor received the PREA audit questionnaire and copies of all relative policies and sexual assault investigations in a timely manner prior to the onsite arrival. This allowed the auditor to review documents and policies to better understand the process and procedures of Coffeewood Correctional Center which is one of the state prisons within the Virginia Department of Corrections. The auditor was at the prison from October 16th through the 18th, 2018. These three full days consisted of a tour of every building in the prison that an inmate would have access too, random one on one interviews with inmates and inmates from specialized inmates as required by the auditors manual. A total of 40 inmates were interviewed during the audit. The auditor also received correspondence from inmates and those inmates were included in random interviews without the knowledge of the prison. Inmates were selected to represent each housing unit wing and this was done through a random number selection in which the auditor counted down on the living unit roster and ask that inmate to talk with the auditor in private. The staff worked with the auditor during the audit and some on site corrections were made at the request of the auditor which will be described later in this audit document. Following the on-site audit the auditor asked for documentation and had some follow up questions for the prison PREA Compliance Manager and the PREA analyst for this region. The working relationship between the two and the responsiveness to the auditor was very helpful in answering questions and quelling any potential concerns that the auditor had following the onsite visit.

Facility Characteristics

The auditor’s description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

Coffeewood Correctional Center is located in Mitchells, Virginia a community within Culpeper county. Mitchells is 6.8 miles south-southwest of the Town of Culpeper. The prison is a reception and classification facility whose role is to intake offenders from the local jails and classify them into the Department of Corrections. It houses offenders with multiple levels of security. Coffeewood supports the Virginia Adult Reentry Initiative. Coffeewood releases 35 to 40 returning citizen per month. The prison has 44 acres of fenced in land with 7 housing units. Six of the units house up to 160 inmates in each unit with 80 inmates on each side in a barracks style open dorm. Single and double bunks are used within the unit. The officer is in an upper control room which has a visual on each side of the unit along with cameras. The medical unit at Coffeewood is a 24 hour observation unit. The prison has qualified mental health professionals, education to provide GED, vocational trade, and a Virginia Correctional Enterprise that puts together all types of office
furniture. Coffeewood has substance abuse counselors who initiate groups and one on one counseling with inmates. Coffeewood uses the unit manager approach and 2 unit managers have 3 units assigned to them with one unit manager having one unit and other responsibilities.

Summary of Audit Findings

The summary should include the number of standards exceeded, number of standards met, and number of standards not met, along with a list of each of the standards in each category. If relevant, provide a summarized description of the corrective action plan, including deficiencies observed, recommendations made, actions taken by the agency, relevant timelines, and methods used by the auditor to reassess compliance.

resides it was made clear that each understand their role, they are supported by their immediate supervisor and the agency. Through an interview with the director of the Virginia DOC it was also clear that he is vested in running safe prisons as it relates to sexual safety of the inmate and treating inmates, no matter their sexual preference, or how they identify in a humane manner that also keeps security as the number one priority.

The auditor reviewed the staffing plan for Coffeewood Correctional Center. Using a site map and during the tour the auditor observed where cameras were located in the living units, the sight and sound observation of the control room in the middle of each living unit and what the officer sees during the walk around of the unit. Through observation of the logs used, interviews with officers, and interviews with shift commanders it was apparent that unannounced rounds are being conducted at Coffeewood and the staff are aware that they are not to let anyone know this is being done. Each shift commander interviewed had their own style and method to make sure they were not predictable when they walked the yard. It was also obvious to the auditor that during the tour the inmates were not surprised to see senior staff on the yard and appeared to be accustomed to their presence. This was also verified to the auditor during the random interviews with inmates.

☐ Does Not Meet Standard (Requires Corrective Action)

Instructions for Overall Compliance Determination Narrative

There are no female inmates housed at Coffeewood Correctional Center. Staff interviewed are aware of the VA DOC procedure with the pat search and shakedown of a transgender female. At the time of the audit Coffeewood had at least one transgender female inmate. Random interviews with inmates who have identified as transgender supported that the staff at Coffeewood treat them in a respectful manner while performing the role of their security job. During the audit it was brought to the institution’s attention that the inmate who was identified as transgender female wanted to shower alone. A screen was brought in, a procedure implemented and the inmate was informed. This was an immediate corrective action initiated by the prison and when the Warden informed the inmate of the procedure the inmate was satisfied.

The auditor is aware of the language line that VADOC has available for staff. During interviews staff were aware of how to use that language line. During the time of the audit there were no inmates who were identified as having difficulty understanding English. The auditor interviewed inmates with some mental health disabilities but was able to garner from these interviews that the inmates understood about their safety from sexual abuse and who to contact if they were sexually abused or harassed. They felt safe in the prison but also knew they could talk to their QMHP (quality mental health provider) if they had any concerns.

Once that list is approved the warden has the final say on who is hired at Coffeewood or who comes in as a volunteer or contractor. Staff is aware of their obligation to report an arrest. This was confirmed with interviews with the staff. The prison is on a schedule to have a background check of every employee, contractor and volunteer every 5 years. The investigator had also taken supervisor training. All of these courses and the information that is shared is critical in making sure all investigations are handled correctly so that if any were to go criminal the SIU would not have difficulty when working with the commonwealth attorney to prosecute. The VA DOC places emphasis on the investigator and the intelligence officer having the necessary training tools to complete their job as it relates to sexual assault investigations.

Instructions for Overall Compliance Determination Narrative

These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

A review of the screen instrument used by VA DOC and the staff at Coffeewood Correctional Center provided information to the auditor to show that all necessary questions were being asked and answered to help the prison place the inmate appropriately. VA DOC establishes through their risk assessment whether the inmate is HRSA (high risk sexual abuser) or HRSV (high risk sexual victim). Interviewing one of the staff responsible for the screening when the inmates first arrives provided the auditor with the procedure and the auditor was able to learn how and where this screening occurred. The unit counselors are responsible for making sure that a risk assessment is done within the 30 days of arrival. The PCM has created a spreadsheet and notifies the unit counselor that the time to perform the PREA reassessment is approaching. This is a great checks and balance system established at Coffeewood.

The classification set forth in the PREA risk assessment is not shared with many staff. Only those staff who need to know for inmate placement are allowed access. Coffewood staff are dealing with the inmates they have who have been identified as transgender in a very professional manner. The staff at
Coffeewood are always keeping the safety and security at the forefront and treat the transgender identified inmate in a respectable way. Accommodations are and have been made for these inmates who are transgender. This was supported with interviews with inmates who have identified as transgender female.

Through interviews with the Warden and senior staff it was learned that placing potential victim in involuntary segregation would be the very last resort. They understand the importance of not having the appearance that the victim was "locked up". If the staff felt like the victim needed to be away from the yard they would work with VA DOC headquarters to have the inmate transferred to another prison. During the tour of the prison there were very few inmates in the Restrictive housing unit and none were there for any sexual assault or victimization. The prison tries to limit the amount of time inmates are placed in restrictive housing for any disciplinary reason or charge.

The VA DOC and Coffeewood Correctional Center have numerous ways for inmates to report a sexual abuse or sexual harassment. The auditor checked the phone line during the audit and was shown the email sent to the PREA Coordinator within 15 minutes of when the auditor left the message on the phone. The inmates interviewed knew how to report and knew that their family could report for them. The staff knew how to report if they did not feel comfortable with reporting to their supervisor but all who were interviewed knew the importance of reporting and knew that their supervisor would take the accusations seriously. The staff all knew that a thorough incident report should be filled out following the inmate reporting to them of the allegation. The inmates knew that the third party reporting was not a part of VADOC and that it was confidential if the inmate chooses to remain anonymous.

- At any level of the administrative process, including the final level, if the inmate does not receive a response within the time allotted for reply, including any properly noticed extension, may an inmate consider the absence of a response to be a denial at that level? *(N/A if agency is exempt from this standard.)* ☐ Yes ☒ No ☐ NA

The auditor reviewed the grievance process and the types of grievances that have been filed by inmates at Coffeewood Correctional Center. There have been no grievances regarding sexual abuse or harassment. If a grievance were to be used, once the grievance was received and documented it would be sent to the PCM who would then in consultation with the Investigator at Coffeewood and SIU open up a case. The inmate would be apprised that a case was ongoing and when the case was closed the inmate would be told the outcome of the investigation. Once any allegation of sexual assault is brought to the attention of any staff it is immediately investigated.

The auditor reviewed the Memo of Understanding that VA DOC has with Virginia Action Alliance to provide counseling over the phone to inmates should they call on the inmate phone system. These calls are not recorded and this is posted throughout the living units. The PCM at Coffeewood Correctional Center has also reached out to the provider of their county, Safe Journey, to see if they will be willing to hold groups and provide support since the prison is in their county. The auditor performed a test call to make sure that a counselor was reached via the inmate phone system and the auditor was successful. The auditor learned from Action Alliance that they tell the inmate many times that the information they receive is confidential.

The PREA policy clearly informs the staff of their duty and obligation to report. Through training and staff meetings it is shared with staff the zero tolerance approach and their responsibility as staff. This was confirmed with the auditor during staff interviews. Because the living units are in an open barracks style if any inmate needed to be immediately separated from other inmates they could place him in the one unit that has single or two to a cell but most likely the prison would request assistance to have the inmate transported to another facility. If an inmate who is transported from another VA DOC prison discloses that he was sexually assaulted there the Warden or designee calls that prison and sends an email to that prison providing details of what the inmate alleges. Since they are both VA DOC prisons the investigators and SIU would work together to open a case and investigate. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

All of the staff interviewed at Coffeewood were clear of the procedure if they were the first to the scene. Coffeewood has had little to no incidents where these procedures have had to be used but the security staff were all aware of them. The staff also knew what to do if an inmate approached them and informed them that they were being sexually harassed.

There is a procedure in place for who to contact and who the inmate needs to see if he was sexually abused. This is a very well thought out coordinated plan to ensure that all who need to know are notified. Through interviews with staff it was clear that they communicate with each other not just about sexual assault but as a whole in their day to day activity. This communication is vital if a sexual assault were to occur at the prison.

Coffeewood Correctional center and the VA DOC have provisions in place to ensure there is no retaliation to inmates or staff who report. All allegations are closely monitored by the PCM of Coffeewood and all of this information is conveyed in writing via reports to the appropriate PREA analyst. This allows for the prison and headquarters to monitor the alleged victim and or reporter to ensure that there is no retaliation regarding work assignment, bed placement or in the case of a staff person no retaliation as in regards to promotions of assignment posts. The auditor reviewed the documents that provide instructions for allegations and the monitoring of such accusers. There have been very few accusations at Coffeewood but the PCM was clear in their responsibility as it relates to monitoring.

Coffeewood Correctional Center and the VA DOC use protective custody/restricted housing on a limited basis. Placing an inmate in a restricted environment for their safety would be the last resort.
taken. The primary goal would be to separate the accuser from the alleged victim without penalizing the victim. This was evident in interview with the Warden and senior staff as well as the PREA Coordinator for the VA DOC and the PREA analyst responsible for Coffeewood Correctional Center.

The investigator and the intelligence officer for Coffeewood Correctional Center have received training on investigating sexual assaults within a confined setting. These trainings have occurred at the VA police academy and also nationally. The Coffeewood investigation team works closely with the SIU liaison. This ensures that should the case become criminal that all procedures are followed to provide a strong case for the Commonwealth Attorney. The auditor reviewed the few cases that had been opened at Coffeewood to verify all important questions had been answered in the investigative report. There is open communication between the prison investigator and the SIU. This is vital when making sure that all cases are investigated and that the inmates see the importance of these investigations.

All inmates are notified in writing by the SIU the outcome of the investigation. This was verified by the auditor by reviewing the documents. This information is also shared/copied to the PREA Coordinator for VA DOC. It was noted that there was at least one case where an inmate who had been released was notified in writing. The correspondence was sent to the address that they inmate left with the prison. All notifications are kept with the file that is held by the prison investigator. This allows him to know what has been done and can used for future reference.

### Instructions for Overall Compliance Determination Narrative
The Virginia DOC in their policies and in their practice take a strong stance towards any employee who is found to have engaged in any sexual abuse or harassment. There have been no recent cases at Coffeewood but through interviews with the PREA Coordinator and PREA Analyst it has occurred in other prisons and these cases have led to termination and in some cases prosecution. Staff interviewed at Coffeewood were keenly aware of the hard line that needed to be drawn to be a corrections professional. The auditor noted that staff at Coffeewood are engaging with the inmates which is a useful tool to keep the lines of communication open but the professionalism line between inmate and staff was clear.

The policy and procedure is very clear with contractors and volunteers. They are trained and informed of their responsibilities as it relates to the PREA standards and they are informed of the criminal potential of engaging in a sexual relationship with an inmate while working as a volunteer. The VA DOC informs the volunteers and contractors through training that sexual activity will not be tolerated and at the very least the volunteer/contractor would be prohibited from working in any VA DOC facility.

The VA DOC does not open a sexual assault case if two inmates admit that they are in a consensual sexual relationship but this is a disciplinary violation administered by the agency. In interviewing the investigator it is important to note that just because an inmate had been in a consensual relationship with an inmate does not mean that they could not be sexually assaulted or harassed in the future. Their past relationships have no bearing on the current case. Before any inmate is charged administratively a QMHP determines whether they can be charged as it relates to their mental health. QMHP’s at Coffeewood are available for inmates who have had any sexual assault history in their background while at a prison or charges from the state. The VA DOC rarely pursues false allegations by inmates. They believe that to keep the communication line open with inmates it is best for inmates to see that all allegations are taken seriously and there are no repercussions for reporting.

Through interviews with mental health it was confirmed that before talking to the inmate they obtain informed consent. Interviews with those who conduct the PREA risk assessment and the unit counselors who conduct the reassessment it was confirmed and the auditor verified with documentation that the mental health professional at Coffeewood was notified via email that an inmate had disclosed that they had been sexually assaulted prior to incarceration or at another prison facility. Because of the QMHP being notified via email as soon as the inmate discloses it is well within 14 days before the inmate is called to be seen and offered the services of the mental health professional. The communication line between those conducting the PREA risk screenings and the mental health professionals at Coffeewood is open. The auditor learned during interviews that the mental health professionals at Coffeewood want to provide the best service for the inmate.

Inmates who are sexually assaulted are provided a Sexual Assault exam at a hospital with a SANE. The Coffeewood inmates would receive that same treatment and care that is afforded any citizen in Virginia. The auditor confirmed by reviewing policies, procedures and documentation that the victim of sexual abuse would not be charged for the hospital visit or any necessary medication prescribed to them. The inmate at the hospital would also be provided sexual assault counseling from a trained professional at the hospital.
