

Patrol Canine Presence and Engagement in VADOC Facilities During September 2025

VADOC Research - Strategic Planning Unit 2025

Patrol Canine Presence and Engagement

VADOC utilizes patrol canines to deter inmate violence at its six facilities with the highest security levels. As the chart below shows, the mere presence of canines in a DOC facility deters inmates from engaging in behavior that requires force to be used by staff.

- Of the 43 incidents in September 2025 in which canines were present, 3 (7%) involved the canine actually being engaged.
- In 40 (93%) of the incidents with a canine present, the canine did not engage (deterrent).

Note: There was one canine engaged that only involved engagement of the canine upon an inmate's clothing and, therefore, is not counted as an engagement in this report.
