August 2015

INTRODUCTION

Rebuilt Data Streams

With the implementation of the Virginia Corrections Information System (VACORIS), the Statistical Analysis and Forecast Unit of the Virginia Department of Corrections (VADOC) has rebuilt the offender population data streams used for analysis. These rebuilt data streams adhere to documented data definitions and better reflect actual population figures than previously released data.

Historically, the Statistical Analysis and Forecast Unit has compiled demographic, offense and sentence information for Virginia's Institutional and Community populations and published this information annually in the *Fiscal Year Statistical Summary*. Using the rebuilt data streams extracted from VACORIS, the Statistical Analysis and Forecast Unit is issuing the information previously contained in the old statistical summaries plus additional information that previously was not available in this *Female State Responsible Offender Population Trends Report*.

As a result, the use of all reports, documents, charts and graphs containing VADOC data published prior to March 2010 should be discontinued.

If you have any questions or would like additional information, contact Tama Celi at 804-887-8248 or tama.celi@vadoc.virginia.gov.
